EDUCATION

McMaster University

Hamilton, ON

Bachelor of Technology, Automation Engineering

Sept. 2024 – April 2029

- Concurrent Certificate in Business (ACBSP Accredited) and Advanced Diploma in Chemical Engineering

EXPERIENCE

Sales, Business Development & Engineering Processes Intern

June 2026 – Aug. 2026

Siemens Canada — Smart Infrastructure (Grid Software & PTI)

Oakville, ON

- Built an AI-assisted RFx screening workflow with internal LLM tools, cutting a weekly 16-hour procurement research task down to 3 hours (80 percent reduction); adopted department-wide across Smart Infrastructure
- Developed a bot using Siemens internal AI tools to scan utility Integrated Resource Plans (IRPs) for early signals of client capital plans, supporting proactive business development
- Supported GSW and PTI business development for utility and grid-operator clients, tracking opportunities in Salesforce
- *Worked directly with the Head of Grid Software (Canada) & President of Siemens Advanta*

Media Search Analyst (iOS)

May 2025 – July 2025

TELUS Digital AI

Remote

- Evaluated 2,000+ AI-generated search results across music, books, podcasts, and video for relevance and ranking accuracy
- Reviewed app-store metadata and query-result alignment to help identify search failure modes

Sales Associate

May 2026 – Present

Sunglass Hut

Halton Hills, ON

- Consult with customers to recommend products and consistently meet or exceed monthly sales targets
- Build rapport and guide purchase decisions in a fast-paced retail environment, driving conversion and repeat business
- Manage transactions, cash handling, and merchandising standards to keep the store sales-ready

PROJECTS

TruthLens | *Python, FastAPI, Claude API, JavaScript, Chrome Extension, Render*

Mar. 2026

- Built a full-stack AI Chrome extension (Manifest V3) that flags political bias, credibility, and manipulation in news articles via the Claude API and a FastAPI backend
- Engineered prompts for reliable structured JSON output; deployed a live REST API on Render with rate limiting and retry logic

Employee Management System | *C++, OOP*

Mar. 2026

- Designed a class hierarchy (Employee, Manager, Intern) using inheritance and polymorphism for dynamic dispatch across employee types, with file I/O for persistent data storage
- Applied object-oriented design principles to structure a maintainable, extensible codebase across multiple employee types

Hackathon Judging System | *Google Sheets, Google Forms, Devpost, CSV*

Jan. 2026

- Built a judging pipeline ingesting Devpost submissions via structured CSV for multi-judge scoring
- Ran it live during a hackathon, validating data and generating a leaderboard for 50+ submissions

TECHNICAL SKILLS

Languages: C++, Python, JavaScript, HTML/CSS

AI & Automation: Prompt Engineering, LLM Integration (Claude API), Structured JSON Output

Developer Tools: VS Code, Visual Studio, AutoCAD, Autodesk Inventor, Arduino, Render, Salesforce

EXTRACURRICULARS

Finance Coordinator

July 2025 – Present

Google Developer Groups, McMaster University

Hamilton, ON

- Manage budgets (10,000+ CAD), tracking expenses and cash flow for a university tech community running hackathons, workshops, and events
- Secured sponsorships by building relationships with tech companies and industry professionals

General Volunteer

2019 – 2024

Lady Fatimah Foundation

Milton, ON

- Coordinated logistics and volunteer teams of 20+ for community fundraising events
- Tracked campaign metrics to guide strategy for future initiatives
